Have a good day everybody,

whereas we strongly disagree with the way the global pandemic in the Czech Republic is being resolved, considering the fact that as Minister of the Health was appointed someone, who has a strong relationship with the pharmaceutical industry, WHO, European structures for chronic disease preparedness and more over he is (even if he just were) the Chairman of the Vaccine Society of the Czech Republic, **then by all this he is a completely unprecedentedly, unacceptable for us in this situation and he is for us a threat to all of our Czech citizens by its conflict of interests in this situation.** Due to the fact that the numbers of positive COVID-19 numbers are also shamelessly significantly manipulated, meaningless and ineffective measures are being introduced, especially damaging our economy, we are starting to collect signatures on the attached PETITION for the establishment of **the Parliamentary Commission of Inquiry THE LIGHTNING BOLT and completion of requirements.**

The Czech Television, which should bring us independent and balanced news, is absolutely not doing its job, and instead is haunting the citizens of the Czech Republic with artificially inflated numbers, all in accordance with the strategy of the globally prepared scenario. About information related to the current situation, including the information provided from the world, where those are being in our eyes literally manipulated foreign news, whether what is happening in the US, Europe or Belarus - all this is for our money "of us taxpayers" something completely unimaginable and unacceptable. It is clear to us, that experts and representatives of the scientific community in particular have a large share of their responsibility for the whole pandemic situation. We already sent them a very emphatic [open letter](#) on Tuesday. In the same way, we informed all the Chairmen of the Parliamentary groups and all the non-attached Parliament Members about the Petition on Tuesday.

REPUBLIC

It is absolutely unacceptable for us, any damage done to the Czech economy and an incredible gamble with the health of all Czech citizens. **We would very much appreciate it if you, as those responsible for the state of our country, help us to stop the chaos that is slowly and surely threatening not only all the citizens of the Czech Republic, but also our national sovereignty, our freedom and democracy.** We know about the planned global economic reset, as well as the implementation of new technologies based on artificial intelligence, and we clearly do not consent with this procedure. **None of you have the right, nor have you received a mandate from us Citizens of the Czech Republic to take such steps that threaten our entire society. Do the right thing, and advocate as citizens of the Czech Republic with your own personal responsibility and with the use of the power entrusted to you by us, to support the attached PETITION and to meet all the requirements set out therein. Send a positive signal to the whole nation, and calm the situation before its completely inevitable and uncontrolled escalation.**

In perfect respect on behalf of THE LIGHTNING BOLT,

Radek Pech
